

Modernism proposition

TIBERGHIE Florence
LAHEURTE Louis

After a proposition may be more brutal, this new moderne proposition try to fonction like a machine, like one object.

The district is like a machine and composed by cell. In a first time the habitation where people sleep, eat and live in the form of big tower. In a second time : fonction and equipement like the school, sport, and offic for work. On the middle of the district there is the main square where we can found the main building of administrative and shopping center whose blend a big center for recreation and meeting. For have a separation between pedestrain and tram, the main square is a slab under the public transport.

Finally three coridor with three and herb cross the district for join the city center and creat park and recreation fo children.
